HAUS TOKEN

Fukuoka Joe | Crypto Fun Haus Two-Pager

1. *What is the HAUS token?*
   The HAUS token is native to the Crypto Fun Haus Discord server. It is an entertainment focused TRC-10 that can be stored in any Tron wallet. At launch it will be used for tipping, wagers, contest/lotto entries, trading, Discord Nitro, and payment to admins/mods.

2. *What is the Crypto Fun Haus?*
   It is a server that fully utilizes bots and the functionalities of the Discord ecosystem to provide cryptocurrency's most entertaining gathering spot. At launch there are 16 cryptos and 3 game coins that can be traded in the server; with over 10 bots that provide memes, nsfw media, TA/charts, spot prices, gambling, gaming, and much more. ITO funding will be used to further expand the selection of cryptos offered within the server and coin devs are welcome to reach out about integrating their coin in the Fun Haus.

3. *Roadmap*
   There is no development roadmap as HAUS will always remain a token. That being said there are project goals that include:
   HAUS tip bot | TronDEX Trading | Exchange Listings | Tip Expansions | Merch

4. *Token Specs*
   Available to purchase solely through your Tron wallet.
   Total supply = 17,777,777,007 | Price: 1 TRX = 5 HAUS
        ITO Dates = February 5, 2019 –> October 5, 2020.

5. *Distribution*
   5B for ITO sale | 5B for server giveaways and airdrops
   3B for bounties/partnerships | 2B for team distribution
                   2,7B locked up for two years

6. *Team*
   Landlord (4) – these are server admins and trusted acquaintances of the HAUS founder. Landlords offer escrow for any transaction in the server for a 1.5% fee. Each Landlord will be responsible for a wallet detailed in distribution.
   Mods (11) – these team members will be recruited from existing Discord servers and will manage the day to day of server operations. Each team member will receive a quarterly stipend of 10M HAUS for their efforts.

   Mods can become Landlords but the total team amount will not be >15 people.

7. _Account Security_
All cryptos you have on the Fun Haus server are tied to your Discord account and can be withdrawn anytime. If you have any significant amount of crypto in the server, it is highly recommended to use 2FA and a strong password. The Fun Haus team, bot creators, server promoters or members cannot restore lost funds, revert transactions, nor bear any responsibility for your funds.

8. _What you do on the Server_
We have introduced nothing new or exotic into the Discord ecosystem. We've harnessed the existing bot and webhook infrastructure to provide a really cool place for crypto heads. Your money is your business and what you do on the server is your prerogative. We wouldn't have enabled you to ping a furry porn pic if we were going to judge you.
So long as you understand that no one on the team is responsible for what happens to you, you do not post CP/overly explicit images, and don't scam, we're good.

Behavior is monitored through a bot, with 3 warnings = kick and 5 warnings = ban.

9. _Crypto Roast Podcast_
Spend even a short time in the server and you will see that the Landlords have a pretty good sense of humor. We also know crypto pretty well and can crack on anything. As our goal is to provide entertainment that relates to cryptocurrency, we're going to make a weekly podcast with a variety of skits that rag on the shittiest parts of our beloved space.
The majority of ITO proceeds will be dedicated to bootstrapping the needed equipment for podcast, developing the show, promoting it, and expanding its reach. Eventually we want to welcome coin/exchange/media reps onto the show to defend the wretchedness of their project.
